

Code

```
#include <stdio.h>
struct student{
    char name[20], cell[20];
    int videos;
};
int main() {
    struct student x[300];
    int i;
    for(i=0; i<2; i++) {
        printf("%d", i+1);
        printf("Name: ");
        scanf("%s", x[i].name);
        printf("Cell: ");
        scanf("%s", x[i].cell);
        printf("Videos: ");
        scanf("%d", &x[i].videos);
    }
    for(i=0; i<2; i++) {
        printf("%d", i+1);
        printf("Name: %s\n", x[i].name);
        printf("Cell: %s\n", x[i].cell);
        printf("Videos: %d\n", x[i].videos);
    }
    return 0;
}
```
